"Kenneth Smith", Golf Clubs,
Box 41,
Kansas City - Missouri 64141.-

Dear Sirs,

Many years ago, I think it was around 1942, I bought you, through a Professional in Mexico City, a set of golf clubs and I have been very happy with them.

Now, I developed some difficulties in using the iron clubs and somebody advised me of using all the set in wood clubs to avoid the troubles.

Lately, Mr. Gregorio Sanz, Professional "Club de Golf San Vida", Palma de Mallorca (Spain), told me that you were manufacturing such clubs, but that you do not have at any time filled your Fitting Charts.

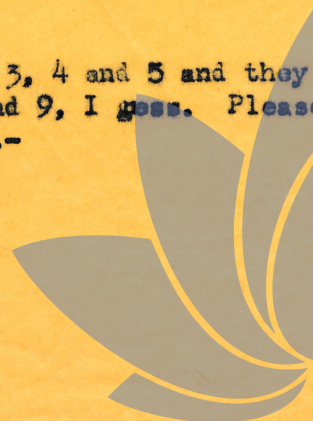

I am flying back to Mexico City one of these days and I should very much like, when flying back to Europe in the middle of May, to have the whole set of wood clubs ready to be taken with me.

I am 1.79 meters tall and I weigh 76 kilos and I am more or less normally built. May be you have got my measurements which the Professional in Mexico sent you when we bought the first set of clubs. Anyway, I have to take the clubs away when I fly to Europe in the middle of May and I hope that you will be able to help me.

If you have any doubts about the balance weight of the clubs, my opinion is that you have to give me the easiest to play with, because I play around 100 and I have never been a good player.

I am including the letter that Mr. Sanz gave to me and I beg you to reserve the commission -if any- for him.

P/S.- I have already your woods 1, 2, 3, 4 and 5 and they fit me perfectly. What I need, then, is 6, 7, 8 and 9, I guess. Please reply to:
c/ Andr maco, 104 - Mexico City.-
