Dear herd Wirtz,

With an enormous pleasure, I received this morning your long telegram wishing me a happy life up to 1990.

From the botton of my heart, I thank you but I have to tell you that I will do anything possible to get to the further age. Even one hundred years don't seem to me enough because of the millions of things that our pharmaceutic companies will have to achieve.

Inmuferon is a great success and I feel very sad that it is not still registered in Germany.

As you know, I have been in Japan and Korea with Dr. Matji and Dr. Pibel and I guess that you are informed of the great success we have had.

It sadness me that you are not able to come to Minorca. Among the big tempest and trouble of the world, we have here a beautiful sunshine and peace.

Please remind me to Mr. Weber.

Please present "mes Hommages" to frau Wirtz y reciba el abrazo cordial que junto con Jacqueline, mi esposa, les enviamos.
